

Firebrand Briquette

CHARCOAL

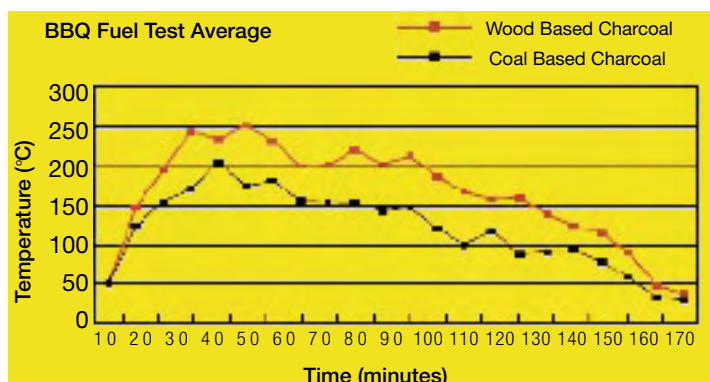

With over 30 years of manufacturing experience, this unique product has been perfected to bring you the highest quality briquette charcoal.

Firebrand Briquette Charcoal is environmentally friendly, converting by-products from the saw mills into a useful energy source. With the improved and efficient production technique, the volatile matter is reduced to the minimum leaving high fixed carbon content in the charcoal which provides long lasting, odourless, smokeless and high heat combustion capacities. In a controlled environment, Firebrand Briquette Charcoal can burn as long as 6 hours with minimum ash residual, less than 5% its original weight. This unique product is made from specially selected 100% natural mixed hardwood sawdust without chemical additives or binders.

Advantages over normal charcoal

- **Higher calorific value** - The minimum heating value of the Charcoal is 7,701KCal/Kg or better.
- **Low volatile** - The volatile matter is reduced a minimum prolonging the burning time of the Charcoal.
- **Higher fixed carbon** - Firebrand Charcoal burns much more efficiently and economically compared to standard Coal Based Charcoal (see graph)
- **Low Ash Content** - The remaining ash content is less than 5% of the original weight of the Firebrand Briquette charcoal
- **Chemical/binder free** - Firebrand Briquette Charcoal contains no chemical or binding agent, thus making it ecologically sustainable.
- **Higher burning temperature** - The charring process is performed at high temperatures giving the product its overall significance.
- **Smokeless** - The product burns without any smoke or fume.
- **Odourless** - The Charcoal contains minimum evaporated substances within its content, eliminating the possibility of odour and fumes.
- **Longer burning hours** - Firebrand Briquette Charcoal will burn longer compared to any of its counterparts.
- **Sparkless** - Unlike its counterpart (hardwood charcoal) Firebrand Briquettes will not produce any spark during initial lighting or burning.
